

# The last 10 years @ Amadeus IT Group ...

... but a varied portfolio .

## CAREER

Amadeus IT Group - Sophia Antipolis / Apr 07 - Present  
Unit Manager

Leading a large team (12-18 developers) in charge of the "Altea Printing and Reading" solution.

Most airport documents (boarding passes, bag tags, load sheets ) are formatted and printed through this solution.  
More and more front / back office documents are formatted and delivered to printers, mobiles or mailboxes through this solution.  
This application is "mission critical" for Amadeus. It is monitored 24/7.  
It handles more than 1 million transactions per day with upwards of 99.9% availability.

Having joined the team in 2007 I ensured the production readiness for our first customer (QF) in May 2008.  
I have put in place Software Quality Assurance (integration, testing, release management, re-design of a big part of the application).  
I kept my team motivated in times of high stress.

The application is composed of distributed C++ and JBOSS servers.
